◦

MacOS 11 Big Sur Only. Use Drivers Version 1.4.3 for older macOS versions

Version 1.5.2 BETA. (download from attachments below)

Monitor flashing has been reported by some users. Connecting to AC power may help resolve the issue.

Version 1.4.3 BETA (download from attachments below)

1. Supported OS versions:

- Big Sur (11)
- Mojave, Catalina (10.14.2-10.15)
- High Sierra (10.13.4-10.14.1) Clone Mode Only
- High Sierra (10.13-10.13.3)
- Sierra (10.12)
- El Capitan (10.11) No Mirror Mode

2. Installation Instructions:

If the disk image file downloads with an .html extension, rename the file to remove ".html" from the file name. The file name should end in ".dmg"

To install the driver, open disk image and double-click on "Fresco Logic FL2000 Driver.pkg".

In macOS High Sierra and newer,

you may need to manually enable the driver before it functions properly.
In macOS Catalina you will also need to enable screen recording.

3. Display Modes Explained:

Extended Mode

Each connected monitor displays a different section of the desktop. The mouse can move between monitors.

Mirror Mode

All monitors display the entire desktop. The maximum resolution is limited to the lowest resolution monitor attached to the system.

Clone Mode

All monitors display the entire desktop. Resolution is set by the native display and image on other displays may be shrunk or scaled to fit.

4. Beta Release

This is the initial public beta release of support for Mac. Please help us improve the driver by providing constructive feedback.

You can help by including a screen shot of the "[About This Mac](#)" screen with any feedback you provide. Along with as much detail as possible about the issue you are having including steps to reproduce the issue.
